ABSTRACTED-PUB-NO: DE 4042354A

BASIC-ABSTRACT:

Pelleted fodder material for general use as an animal feed and esp. as dog food is made from the additive free residue from cold pressed linseed seeds.

USE/ADVANTAGE - The press residues contain all the substances contained in the seeds, including vitamins A,B,E and F, ca. 7% crude fibre, 4.5% mineral substances, 30% N-free extraction substances, 30% protein and 16% oil of which ca. 17% is linoleic acid and 50% is linolenic acid. The pelleted material has excellent resistance to fracture. The prod. ensures very good stomach, intestinal, gall bladder and liver flora and in dogs gives a glossy coat, promotes fertility and musculature, improves performance, benefits the nervous system and combats intestinal colic. The prod. may also be fed to humans, e.g. mixed with yoghurt, to promote the digestion naturally.
